Percentage: 80%

PROJECTS

Real Estate Property Management System

- Developed a full-stack real estate application to facilitate property buying, renting, and selling.
- Implemented a responsive UI using React.js, with dynamic property listings and search filters.
- Ensuring efficient queries and relationships between users, properties, and buyers and sellers.
- Built a Spring Boot backend with RESTful APIs to manage property data, user authentication, and transactions

Image Searching Web Application

- Developed a web application utilizing the Unsplash API to fetch and display images-based keywords.
- Demonstrated proficiency in API integration and effective handling of asynchronous data requests.
- Designed an intuitive user interface, enhancing user experience and engagement.

SKILLS

Tech Stacks: Java, JavaScript, React, HTML, CSS, SQL, Hibernate, Spring boot

Soft Skills: Problem-Solving, Adaptability, Teamwork, Communication
